SUMMARY

Experienced professional and software engineering bootcamp graduate seeking a Fullstack role to challenge and grow skills as an engineer. Dedicated team-player with a growth-mindset and great eye for detail.

TECHNICAL SKILLS

Proficient with JavaScript, React, Ruby, Rails, HTML, CSS, SQL (sqlite, postgresql), GitHub.
Exposure to AWS, C#, and .NET.

TECHNICAL PROJECTS

Climb - [Github](#)

Rock climbing application for logging ascended routes and tracking progress.

- Created reusable React components and user interface.
- Utilized client-side routing with React-Router.
- Instituted Ruby on Rails user authentication.
- Maintained and updated user data with Postgresql database and Ruby on Rails back-end.

Christmas Spotify - [Github](#) | [Demo](#)

Holiday-themed Spotify clone.

- Refactored state management with reusable logic.
- Integrated Spotify API for playlist creation and song sampling.
- Managed data in front-end components.

Mood and To-Do Tracker - [Github](#)

Lifestyle app designed to allow users to track their mood and create a to-do list.

- Collaborated and received real time feedback while creating this pair-programmed web application.
- Implemented RESTful API with the ability to complete all CRUD operations on a JSON server.

EXPERIENCE

American Board of Medical Specialties

Examination Editor

Chicago, IL
03/2014 - 09/2021

- Assembled multiple choice questions using an algorithmic problem-solving approach to formulate well-balanced examinations.
- Edited multiple choice questions adhering to principles of well-structured application of knowledge items.
- Analyzed content of item banks to create item-writing assignments covering areas of need, maintaining a diverse pool of items.

North Bridge Staffing Group

Data Entry

Chicago, IL
09/2013 - 03/2014

- Transcribed year-end fiscal data to computer databases.
- Managed deadlines to ensure timely deliverables.
